### SUMMARY

. Seeking a challenging full-stack developer position with a forward-thinking company, where I can utilize my expertise in frontend and backend development to contribute to innovative projects. With a strong commitment to continuous learning and a passion for problem-solving, I am eager to collaborate with cross-functional teams to deliver high-quality solutions that drive business growth and exceed user expectations.

### PROJECTS

. Constructed a sophisticated Task Management System utilizing HTML, CSS, JavaScript, Bootstrap, Python, Django, jQuery, and MySQL, with an emphasis on user security and seamless task management functionalities. Integrated secure login mechanisms and customizable task attributes, allowing for efficient editing, deleting, and viewing of tasks, all powered by a MySQL database backend.

. Developed an E-Commerce Frontend Project employing HTML, CSS, JavaScript, and Bootstrap to provide users with an intuitive and visually appealing shopping experience. Implemented features such as seamless product presentation and an efficient cart functionality, enhancing user satisfaction and engagement.

. Developed Rentify, a full-stack web application using Django, to empower users in managing rental properties. Implemented key features including user authentication, property posting, viewing, and a like button for engagement.

Emphasized scalability and maintainability in the application's design, showcasing proficiency in Python, Django, HTML, CSS, and Git, and the ability to deliver efficient and user-centric web solutions.

### EXPERIENCE

#### 2025 - PRESENT

. I completed a full stack development course in GUVI . As a learner i genuinely learned a complete roadmap with hands-on experience by performing real-time tasks using key skills learned by myself in GUVI, Designing & implementing Web applications using Python & Javascript
